E-mail:

Approximate number of all students who currently:

Ride a school bus:

Walk:

Ride bicycles:

Are driven in a private vehicle:

Approximate number of students living within two miles of school:

Of students who live within two miles of school, approximate number who currently:

Ride a school bus:

Walk:

Ride bikes:

Are driven in a private vehicle:

If it could be done safely, approximately how many children who live within two miles of school would:

Walk:

Ride bicycles:

What improvements in your community would encourage children to walk or ride bikes to school?

☐ Signs, traffic signals and/or crosswalks ☐ Student education (classroom and/or after-school bike and pedestrian safety lessons) ☐ Escort programs (walking school bus, bike trains etc.)
☐ Increased law enforcement (speeding, crosswalk violations) ☐ Motorist education
☐ Sidewalks ☐ Bike routes or paths ☐ Other. Please provide details:

Does the school or group of schools already have either a Safe Routes to School task force or a committee, working group or similar body that addresses issues relevant to walking or biking to school?

If yes, please identify the committee chair and members of the group. Please include contact information and the role of each individual (e.g. school nurse, local police representative, interested parent.)

If not, would the formation of such a task force be useful?

If so, please identify potential members.

Members who might be able to contribute to the effort include principals, physical education and other teachers, school nurses, parents, students, police (e.g. school safety, community relations and/or traffic control officers), municipal leaders (e.g. city or town manager and/or public works, planning and community development officials), key community leaders (e.g. bike shop, cycling club, walking organizations, local businesses), and any other individuals who might be interested in the program. (Include addresses, telephone numbers and e-mail addresses, if available.)

If possible, identify a key person who will contact task force members to inform them of meetings and coordinate with the Safe Routes to School state coordinator and Regional Planning Commission:

Please return your completed survey by regular or e-mail to:
